#	Common Name	Scientific Name	Ecol. Status	Abundance	References
1.	Red-knobbed Imperial Pigeon	<i>Ducula rubricera</i>	Res bre	1 obs leaving the island 31 July 1990,	1,
2.	Yellow-vented Myzomela	<i>Myzomela e. eichhorni</i>	End NGa Grp	4 obs Aug 1990,	1,

### KEY

#### **Ecological status**

**End** = Endemic to Island unless otherwise stated, **Res bre** = Resident breeder, **Res** = resident ie breeding not proven or not likely. For seabirds it means they have or should be found in that area: note other refs. **Vag** = Vagrant, **Res/mig** = Part of population migratory, **Sum mig** = Summer migrant, **Win mig** = Winter migrant, **Spr/Aut mig** = Passage migrant in Spring and Autumn, **Intro** = Introduced.

#### **Abundance**

**R** = rare, **S** = scarce, **UC** = uncommon, **MC** = moderately common, **LC** = locally common, **C** = common, **VC** = very common, **A** = abundant, **P** = present.

**Colour coding** applies only to one species on a particular list. eg. An abundance comment in **red** for the Brown Booby refers to the Ref # in **Red** for that species only.

**Alternate Island Names & alternate common Bird Names are recorded in two separate spreadsheet files.**
